DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishizaka (JP 2002044446 A).

Ishizaka discloses a method of creating a threshold matrix for stochastic screening, comprising the steps of: providing a digital halftone image representation; printing said halftone image; obtaining dot-gain measurements of pixels of said printed image; and using said obtained dot-gain measurements for creating an improved threshold matrix (see abstract).

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3-11 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art searched and of record neither anticipates nor suggests in the

claimed combinations, obtaining dot-gain measurements of pixel agglomerates, providing a merit function, providing a geometrical function, calculating values of the merit function for filled or non-filled pixels of the matrix, or updating values of non-filled pixels in the matrix according to the geometrical function.
